The cost of that data transfer is covered by your internet service or the data plan on your phone. So try our free and simple filehosting service now. filehosting provides an easy possibility for you to send large files to your friends. Alternatively you can choose to share your download links on blogs, forums and social networking sites. Keep your files private, or send your download links only to friends or family. You decide who you want to share your files with. Simply upload your file and share the link. We have no file size limit. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device. It is also allowed to link to thedownload page from websites and communities. There are no restrictions on the number of times a file can be downloaded. Any file in any format can beuploaded and downloaded for free. File is free to use with no gotchas and no hidden fees. No account or credit card is required to get started. You don't needany special software installed to be able to download your files. When you use file, you avoid storing the file you're sending in your cloud storage or mailserver. Unfortunately, we can't make that part free. You can give this download link to your friends by mail or instant messenger. You can upload any type offile (movies, music, documents, images, zip files and more). Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, manyteam chat apps have limits to the size of files that can be transferred within their apps. If only we could, we surely would! On the other hand, using file canactually save you money. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. Ourservice is completely free for everyone. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. Using file, you can circumv
