You can upload any type of file (movies, music, documents,images, zip files and more). Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees.When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Keep your files private, or send your download links only tofriends or family. The cost of that data transfer is covered by your internet service or the data plan on your phone. filehosting provides an easy possibility foryou to send large files to your friends. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps.
