Downloads: 1,964,441 | I like: 1,747 | Author: Welsh & Sabotage | 31 July 2019 Players are of different types. Some love to progress slowly enjoying every part of the game. Some love to run and finish the missions. Some play for fun and don't worry about the game's progress. However, there are few players who like to bend all the rules of play and wanted to play the game in God mode. Speaking specifically of GTA V, there is an impressive available mode that can provide unlimited resources so you can run through every part of the game. This mod provides a lot of options for players to choose from and activate their favorite super skill within the game. All you have to do is extract ScriptHookV.dll & Endeavour. Assign files in the main folder of the game and you are good to go. Few features highlighted: There are specific areas on the map of GTA 5 where battles between bands are normal. If you want to get into a gang, what's better than unlimited ammunition. Yeah, you heard it. You can activate the unlimited ammunition command so you can shoot everything you want and show the bands that is the head in those areas. Another special skill that is unlocked through the Endeavor Mod menu is the super run. You can run faster than most cars and reach the desired destination in no time. You could become the GTA flash V simply by clicking the ability to super run. Players who are not a teleport fan can use the super run to save time. After the super run, there is another skill known as a super jump. This ability allows players to jump higher than buildings. You can jump from the building to build explore the vast area of Los Santos. There is a special menu for vehicles. You can choose any vehicle you want and the vehicle will appear out of the thin air. You can choose from luxury cars to heavy vehicles. The jets are available even if you like to have air driving experience. An entire range of features is available for players in Endeavor Menu mod. You can turn on slow-mo, you can clones of yourself, can bring birth objects into the game and many others. its gives self exclusive ability to float not only on water, but travels at supersonic speed. therefore you do not need to redirect to the bridge when you can take your vehicle right through the river and the sea. you play all the game in god mode which means you have unlimited health, endurance, skill and shooting skills. You can also activate the option without cops in the mod menu that allows you to break unlimited rules and you are not arrested for any crime. All in all, the Endeavor-mod-menu is perfect for occasional players who want to change their grand mood playing theft auto v and relax. screens: Vetrina: Features of the face: shoot 4k bags of money out of the gun (money accounts under jobs on the social club) give all weapons spawn any car, including vehicles at risk no lag teleport no cops max statistics (driving, shooting, strength, resistance, etc.) box esp drive on the water! rpad no problem with the label xbox open menu - dpad left & a & x navigate - dpad left and dpad activate right - a Close/Go back - weapons xbinds vehicle - left thumb tenor - right instant brake - rb super speed & flying car - lbps3 open menu - dpad left & square & x navigate - dpad bind no right activation - x close / go back - squarebins l1keyboard open and active menu - numpad5 navigate - numpad2 & numpad4 & numpad6 & numpad8 Close/Go back - numpad0binds vehicle weapons - numpad1 boost bind - instant brake f1 - numpad3 super speed & flying car - numpad7how to install:1. copy ScriptHookV.dll & Endeavour.asi in the main folder of the game, i.e. where gta5. exe is located. 2. in order to load plug-ins you need to have asi loader installed, you can separately or use the latest version that comes with this distrib (dsound.dll). When you extract the xml file to add rows (if you do so rather than modify it directly in OpenIV), depending on what you use to open it (Notepad, Notepad++, Word etc) and then edit it, when you save it (even if you do as well as UTF8 which is the format indicated) some of the characters become changed. Here is an example: the original XML file has this at the beginning:
