If it has, raise the feed to ensure the fabric will move forward. Computerised machines will remind you to do this. This will switch the machine back to Rethread the machine following the threading instructions in your machine's instruction manual. You will also find instructions for your machine online via the Brother solutions centre Note We find that Butterfly and Singer Branded needles are often not compatible with Brother sewing machines and may cause issues with your machine not picking up lower thread. We would recommend using either Organ or Schmetz branded needles.

Rethread the machine following the instructions in your manual and ensure that the foot is raised. If there is tension when pulling the thread, then the thread may be unsuitable for machine sewing and should be replaced with machine sewing thread from a reputable brand. It's possible there be a timing issue with your machine. Contact your Brother dealer to arrange a service or contact our customer service team. Make sure the presser foot is lifted before threading the machine. Set your bobbin correctly into the machine. For top loading bobbins, the thread needs to be going around the bobbin in an anticlockwise direction. Use the guides on your machine or refer to your instruction manual. If you have a mechanical machine, check that the foot is lowered before sewing. Computerised machines will remind you to do this. Using thread that does not pull through smoothly can cause thread breakages, poor stitching or damage to your machine. For best results, you should use a good quality, branded thread. The thread should pull through the machine with no tightness.
